

A Baseline Sequence

B Repeated Sequence

C Partner Conditions

$$p_{DD} \leq 1 - \frac{c}{b}$$

$$p_{CD} + p_{DC} \leq 2 - \frac{c}{b}$$

D Example of deriving condition

Sequence:

Sequence Round Payoff: $p_{DC} \cdot b$ $p_{CD} \cdot b - c$

Total Payoff: $(p_{CD} + p_{DC}) \cdot b - c$

Partner condition: $(p_{CD} + p_{DC}) \cdot b - c \leq 2 \cdot (b - c)$

$$p_{DDD} \leq 1 - \frac{c}{b}$$

$$p_{CDC} + p_{DCD} \leq 2 - \frac{c}{b}$$

$$p_{CCD} + p_{CDC} + p_{DCC} \leq 3 - \frac{c}{b}$$

$$p_{CDD} + p_{DCD} + p_{DDC} \leq 3 - 2 \cdot \frac{c}{b}$$

$$p_{CCD} + p_{CDD} + p_{DCC} + p_{DDC} \leq 4 - 2 \cdot \frac{c}{b}$$

Sequence:

Sequence Round Payoff: $p_{DDC} \cdot b$ $p_{DCD} \cdot b$ $p_{CDD} \cdot b - c$

Total Payoff: $(p_{DDC} + p_{DCD} + p_{CDD}) \cdot b - c$

Partner condition: $(p_{DDC} + p_{DCD} + p_{CDD}) \cdot b - c \leq 3 \cdot (b - c)$
